

SYNERGIZE YOUR NETWORK WITH SYNERGIX

Company Profile

About Company

Synergix International has become a leading test and measurement solution provider in the Middle East & Africa region. Since the last 20+ years, we have been continuously pushing boundaries and striving towards network technology advancements, enabling organizations to function better.

Today, our business stands as a successful partner with over 10 major players in the Test & Measurement and Infrastructure service industry from all over the world.

Vision

The ultimate satisfaction of our customers is the driving purpose of our existence. We aim to be the leader in providing the best solution to our valued clients and related services by becoming a world-class distribution company. We aspire for excellence in everything we do by adhering to the highest standards of professionalism, by making integrity the foundation of all our relationships, and by focusing on the unlimited potential of our people. We are a responsible partner on the road to progress and development, essential to our community's collective hope for a better life.

Mission

We are a network solutions provider committed to delivering cost-effective, cutting-edge technology solutions including network monitoring, analysis and supervision along with network infrastructure solutions to a wide range of enterprises and government organizations and bringing world-class products to the regional market.

CHAIRMAN'S NOTE

In the dynamic landscapes of the Middle East and Africa, we've thrived as dedicated solution providers in the IT industry and particularly network infrastructure and test and measurement. We value our clients tremendously, whether private or public, big or small. Our journey's heartbeat is our exceptional team, our greatest treasure.

As we innovate and bridge continents, we remind ourselves that our legacy hinges on our people's talents and dedication. Together, we shape this region's digital destiny, offering ingenious solutions to our valued clients.

Our commitment extends beyond profit – we care deeply about our corporate social responsibility and the environment's sustainability. As we handover the management and the mission to the future generations, our principle is to ensure the legacy of our company's relevance and endurance through the ages, leaving a lasting impact on our clients, technology, society, and the planet.

Best Wishes and Bright Future For ALL!

OUR PARTNERS

Synergix International has partnered with the world's leading network design and testing brands to ensure highest levels of quality and service. Our partnerships allow us to bring global networking solutions to the regional markets, enabling our customers to benefit from world-class products & services.

Born out of Finland, Ekahau is the global leader in Wi-Fi network deployment. From WLAN network planning to site surveys and troubleshooting, Ekahau Wi-Fi tools are used by network administrators, wireless engineers, consultants, as well as telecom operators to minimize network deployment time and ensure optimal wireless network performance and capacity.

WiFi Design | WiFi Heatmap | WiFi Report | Spectrum Analysis

Fluke Networks is an America-based, worldwide leader in copper/fiber cable certification, troubleshooting, and installation tools for professionals who install and maintain critical network cabling infrastructures. From installing the most advanced data centers to restoring telephone services after a disaster, their combination of legendary reliability and unmatched performance ensures the highest degree of efficiency.

Cable Tester | Fiber Tester | Cable Certification | OTDR | Installation Testers

Infilink Technologies is based in Canada, having factories in Taiwan and China offers end to end copper and fiber infrastructure solutions from CAT8 Copper Cables to Keystone jacks on Copper and Fiber cables to pigtails on Fiber. Infilink offers a 25-Year performance warranty on its premise cabling installations consisting of 100 percent Infilink Products or Infilink approved products. Synergix International is master distributor for Infilink products for Middle East and Africa region since 2002.

Copper Cable | Fiber Cable | CAT6/CAT6A | Patch Panel | Keystone

Based out of Japan, Kyoritsu is a global leader in electrical measuring tools and products. Having a continuous mastery of quality assurance and control, the company excels in providing top-notch products. Its primary product portfolio comprises Multimeters, Clamp Meters, Insulation Testers, Earth Testers, and several other products.

Industrial Tester | Electrical Tester

OUR PARTNERS

Headquartered in Hong Kong, Altai Technologies is a leading provider of carrier-grade WiFi products and technologies with a presence in over 100 countries, covering over 200 container ports, manufacturing plants and warehouses. Altai uses their patented smart antenna technology along with their cloud-based management system to deliver WiFi networks which promise unparalleled performance, scalability and reliability.

Access Point | Antenna | Outdoor AP | Long-Distance WiFi

For over 25 years, netAlly has been the #1 ally of network professionals worldwide. Based out of the United States, netAlly's complete line of handheld Ethernet/IP test and analysis tools provide innovative and reliable network visibility in the palm of your hand. Their easy-to-use tools simplify the complexities of network testing, providing instant visibility for efficient problem solving.

Network Tester | Cyberscope | Network Troubleshooting | Throughput Testing

VIAVI Solutions is an American, global leader in both network & service enablement and optical security performance products and solutions. Their technologies contribute to the success of a wide range of customers – from the world's largest mobile operators, governmental entities, enterprise network and application providers to contractors laying the fiber and building the towers that keep us connected, VIAVI sells an incredibly broad portfolio of products.

Network Monitoring & Troubleshooting | AWS Security | Packet Capture

Services

OUR SERVICES

WiFi Survey Services

WiFi site survey is the most important and critical part of WiFi design and must be performed to validate what was intended initially with the design. There are different survey types which are performed in different stages of deploying a wireless network. Each one is undertaken differently but they all complement each other in the common goal of delivering a good, robust wireless network. Our experienced technical engineers will carry out the wireless survey and you'll receive a full report, which will outline any work required to maximize your network coverage.

WiFi Consultancy Service

We have specialist consultants to assist with every area from WiFi design to implementation and troubleshooting. Our "WiFi Gurus" have vast experience in designing and troubleshooting large Hotels, Stadiums, Large shopping malls, Exhibition Centers, Smart City Venues, Public WiFi Hotspots, Education Institutions, Super Markets, Large Warehouses, Shipping and Airport Terminals etc.

Service-Calibration

Synergix International is Fluke Networks' Authorized Calibration and Service Partner since 2009. Fluke Service Centers are equipped with the necessary instruments, standards, procedures, and personnel to maintain Fluke Networks' products at peak performance. Synergix International also undertakes calibration and repair services for other equipment such as Fusion Splicer, Power Meter & Light Source, OTDR, Electrical and Industrial Testers.

Rental Equipment

Synergix's rental service program is a great way to save money. Renting equipment from Synergix is quick and easy and allows you to get the best equipment, for the exact amount of time you need it, providing significant savings from your project cost.

Repair and Support

Synergix International Service Center has a specialized team of professionals that are well trained by the manufacturers and have extensive years of experience in service of Test and Measurement equipment and Splicers.

TRAININGS

Fluke Networks - CCTT Training

A cable testing course covering the theory and practical aspects of copper and fibre optic testing and certification.

Ekahau - ECSE Design

Learn the basics of Wi-Fi, how to use Ekahau solutions and receive a highly sought after ECSE certificate.

Ekahau - ECSE Advanced

Dive deep into the most complex aspects of Wi-Fi and become an Ekahau Certified Professional.

Ekahau - ECSE Troubleshooting

Become a Master in deploying and troubleshooting Wi-Fi.
